Project Brief: AI-Powered Credit Risk Platform

Prepared by: FinEdge Capital

Requirements

Build an AI-powered credit risk scoring platform for our NBFC. Loan applications with document upload and e-KYC, integration with CIBIL credit bureau, a machine learning model to predict default risk with model explainability for regulators, an underwriter workbench, role-based access control, full audit trail for RBI compliance, and real-time dashboards. It must integrate with our core lending system via APIs. We need this in production within 6 weeks. Budget is INR 40 lakh.
